Video Phone Message Microphone

Email a video invite >

- Select the video icon to initiate call
- Text message will be sent through the platform to the patient
- If using DAX Copilot, initiate visit and place phone near computer microphone for note generation
- A new window will automatically open for the visit
- It may take some time for the patient to connect through the platform

- If necessary, you can call the patient to facilitate connection to the video visit by clicking the box on the visit room screen.

- When visit is complete, end call
